iStarUSA Computer Inc., established in 1989, is a Taiwan based company with over 20 years of experience. We specialize in OEM/ODM projects and manufacture industrial power supply, Industrial rackmount chassis, rackmount cabinet, and storage enclosure.

Our products have been widely used in the vertical market such as government applications, broadcasting, surveillance, multimedia production, gaming, etc.

iStarUSA has always provided unsurpassed OEM/ODM solution and flexible services by innovative design concepts, quick production, and cost-effective solutions. The ISO 9001 reassures iStarUSA's product quality and our commitment to provide the best for our customer.

iStarUSA builds its strength upon its experience, technology, and strong partnership. We have been working closely with major computer components manufactures and system integrators for years to ensure that our products are widely compatible in the market.
Our products are always in compliance with new industrial standards, which make our design and innovations compatible with today's regulations.

iStar, Good Start !

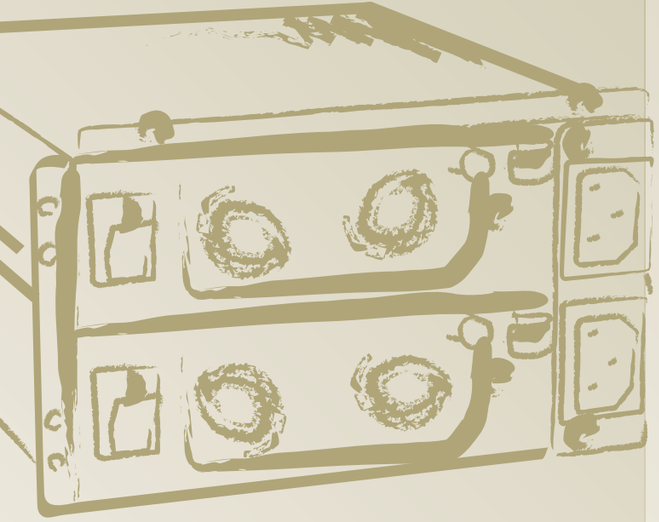
iStarUSA

Industrial Power Division

Active PFC, 80 PLUS, Switching, Redundant Power Supply

Introduction

iStarUSA uses cutting-edge technology in switching power supply design that includes over power, over voltage, and short circuit protection circuits. We meet the EPS 12V and ATX 12V 2.0 standard by using the dedicated 12V and dual 12V outputs technology. Our R&D department has a team of design engineers with over 20 years of combine experience and specialize in redundant application. iStarUSA has multiple patents across China, Taiwan, USA, and Germany. Our customers recognize iStarUSA as a good start for their ODM power supply manufacturer.



Industrial Power Supply

New Generation of RPS Has Born

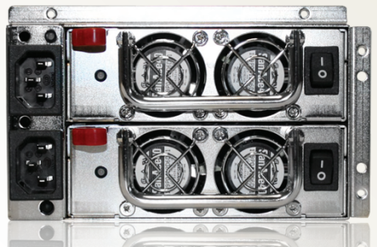
save power with the power efficiency of 75 % at full load

- Mini Redundant Series
- 1U ~ 3U Redundant Series
- 1U / 2U / 3U Switching
- ITX-Switching
- PS2 80 Plus Switching
- PS2 Switching
- Raid Storage
- Power Cables

Application Highlights

Broadcasting

For broadcast quality uncompressed video, it is important to emphasize time is as valuable as money. iStarUSA proudly present our Mini Redundant Power Series with the patented DUAL AC feature. Also, with 1+1 and N+1 configuration, our redundant power supply is designed for mission critical systems to ensure maximum uptime for massive digital data.



550W PS2 Mini Redundant Power Supply

460W 2U Redundant Power Supply

Surveillance & Security

iStarUSA hot-swappable redundant power supplies provides a greatly reliable power solution for compact high performance computing systems. With power sharing feature, it not only extends life of power modules, also supports system zero-down for mission critical application to secure the integrity of your data.

Gaming

80 Plus qualified power supplies are an essential part of the latest Energy Star label specification for computers. iStarUSA 80 Plus series switching power supplies support latest motherboard connectors of 20, 24, 8, and 4 pins and provide at least 80 percent efficiency at 20, 50, and 100 percent loads. 80 plus power supplies save you on electric bills and less cooling requirement and also are ideal for high-end workstation.
