

# iStarUSA Launches the mAGE316U40-PCI-E

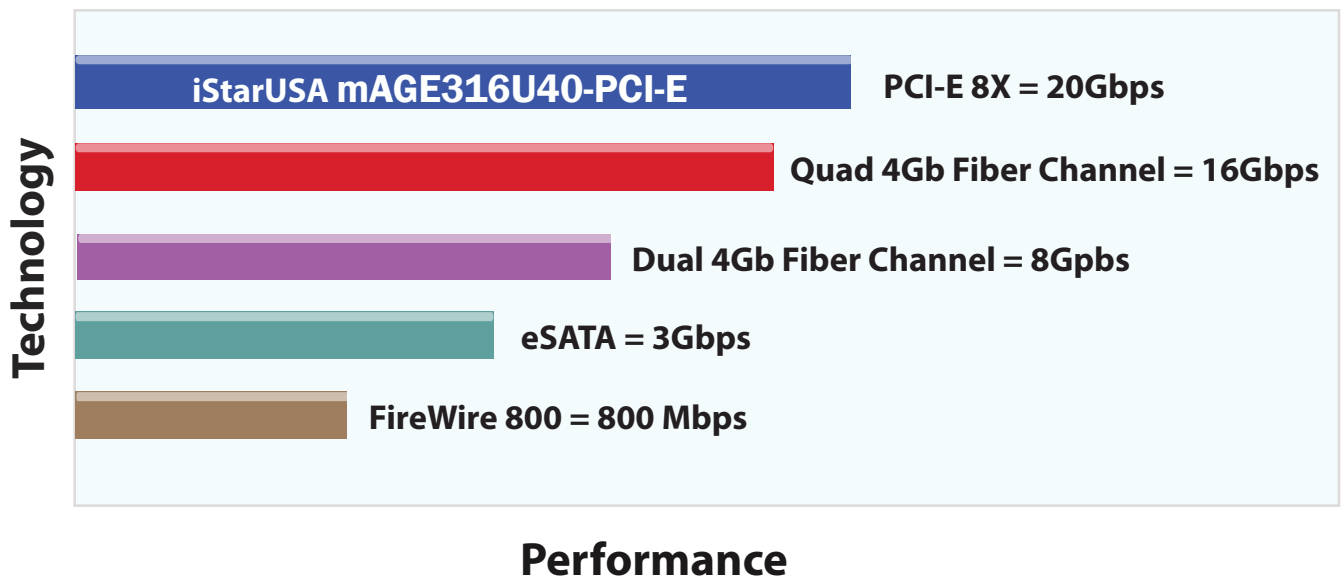

3U 16-bay PCI-e Rackmount JBOD Chassis

**City of Industry, CA - May 10, 2008** - iStarUSA introduces the fastest PCI-Express Rack-mount, mAge316U40-PCI-E. Up to 20Gbps bandwidth with 16TB capacity, it is perfect for video editing, and gaming.

iStarUSA introduces the fastest PCI-Express Rack-mount, mAge316U40-PCI-E. Up to 20Gbps bandwidth with 16TB capacity, it is perfect for video editing, broadcasting, and gaming.

mAge316U40-PCI-E and mAge212U40-PCI-E both are designed with latest technology, PCI-Express x8 Host Bus Extender. With the latest technology, iStarUSA PCI-E Series provide the superior 20Gbps bandwidth enables RAID cards run at full speed with zero delay.

16TB SATA/SAS hard drive capacity with PCI-Express x8 RAID cards set a record of over 800MB/s data transfer rate on RAID 0 and over 750 MB/s on RAID 5.

Moreover, PCI-E series using the PCI-E cable that give you a secure and strong connection to prevent accidental removal, and also optional redundant power supplies provide nonstop operation for you to access to critical data.
