

iStarUSA Computer Inc., established in 1989, is a Taiwan based company with over 20 years of experience. We specialize in OEM/ODM projects and manufacture industrial power supply, Industrial rackmount chassis, rackmount cabinet, and storage enclosure.

Our products have been widely used in the vertical market such as government applications, broadcasting, surveillance, multimedia production, gaming, etc.

iStarUSA has always provided unsurpassed OEM/ODM solution and flexible services by innovative design concepts, quick production, and cost-effective solutions. The ISO 9001 reassures iStarUSA's product quality and our commitment to provide the best for our customer.

iStarUSA builds its strength upon its experience, technology, and strong partnership. We have been working closely with major computer components manufactures and system integrators for years to ensure that our products are widely compatible in the market.

Our products are always in compliance with new industrial standards, which make our design and innovations compatible with today's regulations.

Introduction

iStarUSA is one of the leading RAID subsystem service provider in the industry. Our storage enclosure offer custom solution for your exclusive data storage application. Based on our chassis design experience and support of hardware alliance partners, we are able to provide OEM/ODM storage solution from concept to reality.

Storage Division

RAID subsystem, iSCSI RAID, SAS, eSATA, trayless, HD docking

Storage Enclosure

Invest in Storage Enclosure with HD Ready

different model type designed to suit for various needs

RAID Subsystem

iSCSI RAID

PCI-Express

SAS-SFF8088

eSATA-Port Multiplier

Multilane-SFF8470

External Enclosure

Mini Trayless

HDD Docking Station

Accessories

Digital Content & Filming

iStarUSA offers a solution of high capacity and extreme performance for today's demanding real time video editing, motion graphics designing, and high resolution multi-track audio recording. Many projects and video streaming needed to be stored accurately, safely, and individually to find out the location of data easily. 90% of errors in the film industry are due to malfunction of hard drives and equipment. The professional line of iStarUSA products with superior performance is well suited for digital media content applications

Broadcasting

For broadcast quality uncompressed video, iStarUSA offers a supreme storage solution for D2D (disk to disk) backup and near line editing. In the production industry, it is important to emphasize time is as valuable as money. With RAID architecture, iStarUSA provides over 800MB/sec data transfer rate on our products. It is ultimate choice for those applications requiring extremely high performance coupled with vast amounts of storage capacity.

Gaming

iStarUSA provides solution for high demand of data storage capacity for the gaming industry.

External JBOD chassis support up to 4U-20 Bay Hot-Swap SATA/SAS rackmount disk array storage chassis. It provides users a most big storage capacity for up to 20 SATA/SAS drives for all the RAID configuration. This 4U-20 Bay external SATA/SAS JBOD is designed with 4 high quality eSATA (Port Multiplier) connectors. One side 120mm ball bearing fan offers an enhanced thermal cooling solution for keeping the equipment from heat damage. dAGE420U40-ES provides maximum storage and performance to high density storage system.
